

THE NEW FRENCH REMEDY.

THERAPION

This successful and highly popular remedy, used in the Continental Hospitals by Ricard, Koston, Robert, Velppeau, and others, combines all the desiderata to be sought in a medicine of the kind, and surpasses all other remedies.

THERAPION No. 1

In a remarkably short time, often a few days only, removes all discharges from the urinary organs, suppurating infections, the use of which does irreparable harm by laying the foundation of stricture and other serious diseases.

THERAPION No. 2

For impurities of the blood, scurvy, pimples, spots, blotches, pains and swelling of the joints, secondary symptoms, gout, rheumatism, and all diseases for which it has been too much a fashion to employ mercury, sarsaparilla, &c., to the destruction of sufferer's teeth and ruin of health. This preparation purifies the whole system through the blood, and thoroughly eliminates all poisonous matter from the body.

THERAPION No. 3

For nervous exhaustion, impaired vitality, sleeplessness, and all the distressing consequences of early error, excess, residence in hot, unhealthy climates, &c. It possesses surprising power in restoring strength and vigor to the debilitated.

THERAPION is sold by the principal Chemists and Merchants throughout the world. Price in England 2/6 & 4/6. In ordering, state which of the three numbers required, and observe above Trade Mark, which is a fac-simile of word "THERAPION" as it appears on British Government Stamp (in white letters on a red ground) affixed to every package by order of His Majesty's Hon. Commissioners, and without which it is a forgery.

THERAPION may now be had in tasteless form.

HOTEL STEWART

SAN FRANCISCO

Geary Street, above Union Square

Just opposite Hotel St. Francis

European Plan \$1.50 a day up

American Plan \$3.00 a day up

Steel and brick structure, furnishings cost \$200,000. High class hotel at moderate rates. Center of theatre and retail district. Omnibus transfers all over city. Omnibus meets all trains and steamers. Send for booklet with map of San Francisco. Hotel Stewart now recognized as Hawaiian Island headquarters. Cable address, "Trawets." A B C Code.

HAWAII FARMERS TRY TOBACCO

Successful Experiments Have Led to Several Small Plantation Enterprises.

HILO, April 5.—Considerable interest has been shown of late in the proposition of raising tobacco on this island, and there are several schemes in the wind for starting new plantations for the purpose of producing the fragrant weed.

The experiments which have been conducted by Gamalielson, Branga, and others on lands at Kaunama appear to be a great success. The first seed, Sumatra and Cuba, which was secured from the department of agriculture at Washington, was planted last year and was allowed to grow to seed. These plants were pulled during the early part of the present year and the seed will be used for further experiments.

The leaves from this tobacco were recently compared with Sumatra leaf grown under artificial shade in Alabama and Florida, and in spite of the fact that the local tobacco had not been cured and had been grown in the open, it compared well with the samples sent by the department of agriculture in Washington. As a matter of fact, it seemed to show an even better quality. Local tobacco experts have seen the leaves and have pronounced a very favorable judgment on them and last week samples were sent to Washington to be examined.

The local experimenters have obtained their results from seeds at Kaunama in three different attitudes, going as high as twenty-five hundred feet, and all the leaves looked well. There did not appear to be any appreciable difference in the quality of the leaves from the various places.

At present arrangements are being made to conduct further experiments on a patch of three acres, and at the same time the first steps are being taken towards the formation of a company which will grow the crop on a large scale. The promoters are saying nothing about their plans at present beyond the fact that they have seen the leaves on about a thousand acres of land, which is not suitable for the production of cane, but which, from the experiments conducted so far, appears to be eminently suited for tobacco culture.

The Japanese are also beginning to take a great interest in the tobacco business, and a hut has been formed here during the past week for the purpose of going into the business. The head of this company is H. Miki, the well known Honolulu Japanese, who, during the past week, acted as interpreter for the local court. Besides Miki there are ten Japanese in the company. These are men from Hakaha, who are at present in the cane contracting business, but who intend to place others to look after their cane while they themselves go to Kona to start in the tobacco business.

Miki intends to go to Kona some time this week to make the preliminary arrangements. He will visit the plantation of which Jared Smith is the manager, and will get as much information as he can about the business there, and he will then, if he finds conditions as he expects, try to lease some ten or fifteen acres, presumably from the Bishop Estate which owns large tracts of land in the Kona tobacco belt.

As soon as the land has been secured, the ten men from Hakaha will go to Kona, and will raise their first crop from five acres, in the mean time getting the remainder of their land ready for cultivation. They will begin with a capital of from two to three thousand dollars, but if they meet with success, they intend to organize as a corporation and enter into the business on a large scale. Miki will act as the secretary of the company and will also have charge of the disposal of the crop.
